

# Get More So You Can Give More with Food Bank Solutions from Jet Global

As a food banker, you deal with complex business needs and unique metrics that other businesses don't have to consider.

You're constrained by operating budgets and large community goals, which makes it difficult to find the right solutions to your operational challenges.

Between manual reporting, varying departmental needs, and multiple sources of data that don't integrate, getting the reports you need is growing exceedingly difficult. Resources are taxed, but you need the information. Having to rely on technical specialists is costing you in more ways than one.

## Start Feeding Your Organization the Data It Needs.

With Jet Global solutions, food banks eliminate the need for costly technical resources, redundant expenses, and risky workarounds.

From quickly building financial and operational reports to share with donors and community supporters, to pulling together any data from CERES and other disparate data sources — Jet feeds your food bank the information it needs with reports that are always accurate and up to date.

Jet Analytics is the fast, flexible corporate business intelligence and reporting solution uniquely designed to deliver food banks a ready-to-use, secure, organized data warehouse platform for Microsoft Dynamics.

Want to learn more? [Watch this video](#) and discover why Jet delivers the number one reporting solution available for the food bank community.

With a wealth of training resources available in addition to solutions that deliver value with the food bank industry in mind, Jet Analytics enables:

### Fast Learning

Easy to use, and embedded inside a familiar Excel environment, you can guarantee a low learning curve with a quick implementation time, enabling even entry-level users to quickly access data and build reports.

### Unique and Customizable Reports

Track what you need, from fundraising progress to annual KPI's such as pounds distributed, volunteer hours, number of partner agencies, number of distribution sites, and more.

### Collaborate Across Departments

With the Jet Hub, access shared and published reports from virtually any device that has a web browser so you can work together from anywhere.

### Schedule and Automate Reports

Save time by automating your report updates and distribution whenever you need it.

### Multi-Database Reporting

Easily access and consolidate data from multiple data sources, beyond CERES.

Stop wasting precious time and money agonizing over complicated reporting needs; with Jet Analytics, you can focus on your true mission — solving hunger in your community.

"We tried to build reports manually, which took days and never finished. Jet can create the report we want and put it on a sheet [for] each customer in 20 seconds! Really amazing!"

— Dan Wilson,  
Program Director at Second Harvest Northern Lakes Food
