

Complete Data Access.

Flexible Reporting, Fast Analytics, and
Controlled Budgeting, in Excel and on the Web.

Jet Reports

Any Report - exactly the way you need it.

Jet Analytics

Fast Analysis - without technical expertise.

Jet Budgets

Controlled Budgeting- eliminates chaos.

Jet Hub

Web Collaboration - brings everyone together.

Jet Reports

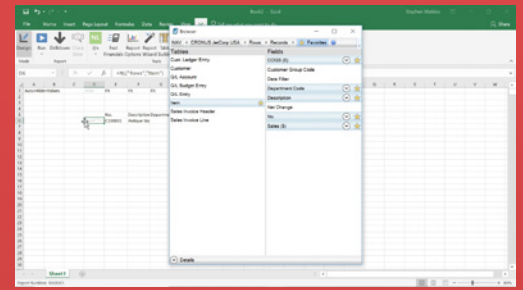

Get all the financial and operational reports you need, in the format that works for you.

Eliminate errors: access and pull all your data directly in Excel instead of copying, pasting, and manually exporting.

Cut reporting time and cost: no more hard-coding or programming reports required.

Have the answers you need: drill-down on the numbers directly from Excel, and access them from anywhere.

Get started immediately: built specifically for Dynamics and installs in minutes with pre-built report templates to use on day one.

"We complete reporting in about a quarter of the time with Jet Reports"

– Mike Ball, JR Simplot

Jet Analytics

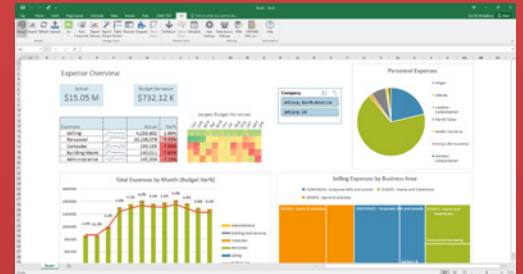

Bring all of your data together in one place to enable everyone in the organization to quickly and easily perform sophisticated business analysis in Excel or Power BI.

Designed for users: remove any need to understand the underlying data structure when building high impact dashboards inside Excel or Power BI.

Accurate data you can rely on: governed data for one version of the truth.

Rapid time-to-value: turnkey installation in hours with pre-built cubes, a data warehouse, and dashboards.

Low cost of ownership: customization and data warehouse automation platform that is 5x faster than manual coding.

"I have saved 75 percent of my time that was previously spent on reporting, analysis, and reconciliations."

– George Mbugua, Davis & Shirliff

Jet Budgets

Control, accelerate, and simplify the fiscal planning process to save time and easily build accurate budgets.

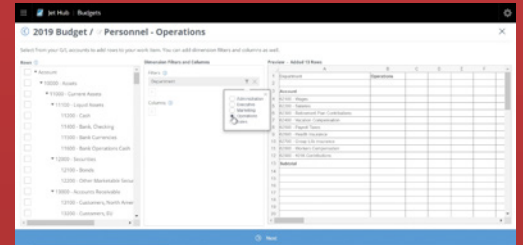

Cut the budget timeline in half: scheduled, automated workflows that are easy to set-up, fast to implement, and built to integrate with Dynamics instantly.

Control the budgeting process: get accurate numbers the first time through managed, governed spreadsheets.

Immediate value: intuitive, Excel integrated solution that can build, organize, and report on your budgets the way you need, with the tools you know.

Increase productivity: fast, accurate budget numbers that improve financial performance across departments..

Reduce friction: all the functionality you need, nothing you don't. Adaptable budgeting that works with your business needs and planning methodologies.

"Budgeting templates which used to take two weeks to create now take a few hours."

– George Mbugua, Davis & Shirliff

Jet Hub

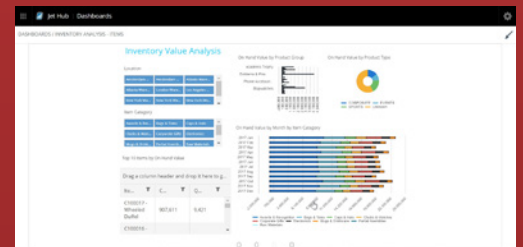

Provide access to the right data, anywhere. Online collaboration, control, and publishing for all of your reports, dashboards, and budgets.

Productivity from anywhere: a fast, easy web portal that is ready to use from any mobile device with a web browser.

Never second guess the data again: version control management and automatic updates so you feel confident it's the right answers, and the right workbook, every time.

Controlled spreadsheets: managed, secure report access and organized workflows for budgeting contributors and owners.

Find what you need now: Complete report search and sharing to locate what you need, when and where you need it.

"I was able to put a report together in 5 minutes and have it distributed to each of our General Managers. It used to take days – now it only takes 10 minutes."

– Raj Patel, Rossmore Management Group
